## EXPERIENCE

---

**IISER, Kolkata** | *Summer Research intern*

May 2024 – Present

- Working under Prof. Kripabandhu Ghosh to create a dataset of sentiment-analysed famous sports controversies with applied stance detection

**AIISC** | *Research intern*

March. 2024 – July 2024

- Worked with Prof. Amitava Das on Prevention of Hallucination in LLMs
- Part of the data collection team- Performed web scraping of news articles and posts. Generated synthetic data using various open-source LLMs.
- Tagged LLM-generated synthetic data with entities using GLiNER and other open-source models.

**Clinical AI Assistance** | *Research intern*

Dec. 2023 – March 2024

- Worked closely with the Research Team for the main project, building dataset and testing the model's generated output with other Text Generative tools like GPT etc.
- Used HuggingFace API to use various LLMs to test our generated response to the original ones
- Data Gathering and cleaning and performing Data Analysis on the generated output to view model's efficiency

## SKILLS

---

**Languages:** C++, Python

**Frameworks:** Pytorch, Keras, Flutter, Flask

**GenAI Tools** Langchain, LlamaIndex, Chromadb, Pinecone, FAISS, HuggingFace

**NLP:** GRU, RNN, LSTM, Bi-LSTM, Transformers, LLMs

**Computer Vision:** CNN, OpenCV, YOLOv8, GANs, ViTs

**Tools:** Streamlit, Git, Github, Firebase, Docker, GCP

## PROJECTS

---

**Paper/Architecture Replication from Scratch using PyTorch** | *GitHub Repository*

2024

- \* **Tools:** Pytorch, HuggingFace Spaces (for deployment of smaller versions of replicated models), Git, Github

**FarmGenie (GeoHack 2024)** | *Empowering farmers with real-time insights and expert guidance via AI-driven space* 2024

- \* **Role:** Backend (AI/ML Integration)
- \* **Vision/Goal:** In the ever-evolving agricultural landscape, farmers often face challenges in accessing up-to-date knowledge and resources to improve their farming practices. To address this, we have developed a comprehensive product that leverages the power of LLMs as Experts and Agents to create an interactive platform for farmers.
- \* **Solution:** Our platform utilizes LLMs and a Mixture of Expert (MoE) approaches to provide precise guidance on soil management, plant disease identification, and irrigation techniques. Built as a scalable web application with a Next.js frontend and backend, and supported by a Redis queue and multiple worker nodes, FarmGenie ensures robust performance. The system's multilingual support, interactive community forum, and up-to-date knowledge base facilitate seamless, expert-driven assistance for both new and experienced farmers.
- \* **Tools:** Tailwind CSS, TypeScript, Next.js, Flask, Python, Langchain, GeminiPro API, peft, bitsandbytes, transformers, PostgreSQL, FAISS, Pinecone, MySQL, Unsloth, GCP, Docker, Vercel, DigitalOcean

- \* **Role:** Backend (AI/ML+Server)
- \* **Vision/Goal:** Our solution tries to bridge the knowledge gap between a teacher and a student in online classes by leveraging the power of AI to provide the teacher and student with insights to better prepare themselves for the course/lecture.
- \* **Solution:** Implemented features such as- Detection of Emotion and Attentiveness of a Student for better understanding of student’s understanding of a topic, Topic Modelling to know exactly where he/she lost attention, QnA with uploaded PDFs (Handwritten/Printed) along with any Videos/Tutorials and Reverse Video Search to quickly look for any concepts in the same.
- \* **Tools:** Flask, Python, Gemini API, Whisper API, HuggingFace Open-Source Models (EmotionLLM), MTCNN, LangChain, Cloud Run, GCP(VM)

MoviesMania | A Reverse Search based Movies Recommendation System(Geek-o-thon @IIIT-BH)

2023

- \* **Role:** Team Lead
- \* **Vision/Goal:** To provide an interface to users to find similar movies/web-series recommendations based on an uploaded video clip/YT Short.
- \* **Solution:** To make use of the various faces of actors in the provided clip and the details provided(title, genre, plot) for the prediction of the movie’s title (if available in the dataset) or similar movies/web series.
- \* **Result:** Prediction of movie’s title(if available in the dataset) with 78% accuracy and similar movies with 85% accuracy.
- \* **Tools:** Keras, Tensorflow, Word2Vec (Word Embeddings), MTCNN, NLTK, Spacy, VGGFace, OpenCV, Streamlit, Render

ACHIEVEMENTS

- 2nd place @GeoHack ’24 Finale

2024

Secured 2nd position at finals of GeoHack 2024 with our project- FarmGenie organised by IEEE GRSS Kolkata and SAADRI.
- Finalist @YESIST12 ’24- Special Track

2024

Led the winning project PlogPayouts at YESIST12 ’24 under Special Track category
- Geek-o-thon (D3 @IIIT-BH)

2023

Led the winning project MovieMania at D3 2023, inter-college hackathon in AI/ML domain

EDUCATION

- International Institute of Information Technology Bhubaneswar

2023- 2027

BTech Computer Science Engineering
- Delhi Public School

2022-23

CBSE Grade 12

Percentage: 91
- Amity International School

2021-22

CBSE Grade 10

Percentage: 96
